PRODUCT CATALOGUE

Find out how our success was born and how we did it.

Goals • Action Plans • Motivation

The natural character is best expressed in latest tap models. All this comes with a collections of pieces, with smooth and slender lines which are likely to create a buzz in the bathroom through an indissoluble link between water and element.

Indeed, Irwa is built on the platform of highest quality standards, aesthetics and with the intent of providing world class products.

Today, we are leader in the bath fitting category that has transformed the industry from merely utilitarian to inspirational.

Our innovation, commitment and performance have been our core philosophy, We have crated presence through continuous R&D in design.

The result is a range of ergonomic taps, which draw inspiration from nature and are based on the most innovative and effective technology.

At Irwa, we are dedicated to developing unique designs at affordable prices that can be enjoyed by everyone.

With environmental issues affecting our lifestyle choices, many of our products now feature Irwa Water save to reduce flow rates.

This offers customers the benefits of water conservation without compromising on performance or style.

simply or classy, extravagant or fittings combine
young fresh design with innovative **TECHNOLOGY**

All products carry 7 years warranty against any manufacturing defects.

CONSUMER GUIDELINES

Consumer satisfaction is our basic motto, our objective is to provide quality products.

It is our aim to maintain direct link with ultimate consumers, educating them about product quality, convenience of operation and usage and also preventive maintenance measures required at the consumers end.

The following guidelines, when followed by plumbers & consumers, ensure optimum and trouble-free performance of our products for years to come.

- Supply pipelines should be laid straight and vertical keeping the number of joints to a minimum-keeping the number of bends/elbows limited in the fittings.
- Supply lines must have vent pipes for removing air-locking in the water supply lines so as to get smooth flow water through the fittings.
- Flush all pipe lines before starting installation of metal fitting so that dirt and other foreign particles should not spoil the metal fittings.
- All tiling work should be fully completed before installing metal fittings.
- To protect the finished taps and fitting from dirt, stains and other damages, cover them with polypack/cloth after their installation till they are put to actual use.
- Clean the aerator at regular intervals of time for free of water from the fitting. Weekly cleaning may be better.
- Please buy products from authorized dealers only to ensure genuine quality material.
- To retain the original shine & sparkle, fittings needs a certain amount of care.
- Don't use aggressive cleaning agents because these may spoil the finishing of your fitting.
- Don't use salt or vinegar based cleaning agents to remove scale or scale related agents.
- Clean the fitting with mild soap lather for chrome plated surfaces.

TERMS & CONDITIONS

- Goods once sold will not to be taken back at any type of Conditions.
- Any type of dispute in Quantity, Quality, Rate, etc.. Inform with in 10 days after we will be not responsible any type of Situations.
- The Taxes will be charged as according to government rules.
- As per market conditions discount structure will be change without any prior notice.
- Packing / Forwarding will be charged extra.
